Multi-core CPU runs high-definition video CODEC
 You've voted with your clicks for Telairity Semiconductor's multi-core video processor that can handle the computational requirements of the H.264 MPEG-4 high-definition CODEC. The device's programmable architecture combines five independent vector/scalar cores, a video controller, and a DRAM controller. [Read full story »](#)

[DOVICO Project Tracking Software](#)

Award winning DOVICO Track-IT Suite saves each employee 1 hour per week on timesheet and expense entry. Managers save over 2.5 hours per week on business operation efficiency, project tracking, reduced billing cycles and real-time reporting.

[Boundary-Scan seminars across N America and Europe](#)

JTAG Technologies presents seminars in the US, Canada, and Europe for test engineers, system designers and production managers covering board/system-level testing and in-system programming of flash memories and PLDs and include demonstrations.

[IC Solutions - Thinking You Can Build On](#)

PMC-Sierra makes a wide range of ICs: MIPS based processors; SERDES, DSPs, CRSUs; Retimers; Ethernet (FE, GE, 10GE), SONET, Packet-over-SONET, ATM, Frame-Relay, T3, E3, T1, E1, framers, switches, controllers, mappers, LIUs and MACs. Visit our site.

[Quickly Add 24-bit Audio to Your Next SOC](#)

Jumpstart your audio-enabled SOC design now with Tensilica's 24-bit Xtensa HiFi Audio Engine. Because it's programmable, packages for AC-3, G.723-1, G.729AB, MP3, MPEG-2/4, and WMA can run on the same hardware.
